CENTRUM TER ONDERZOEK VAN DE AMAZONE BIJBEL

Preface

The African Sea Scrolls is Survival literature.

This oracle came through in times of great persecution, tribulation, slavery, torture and imprisonment, from a time of exile.

These are songs of lamentation, songs of war, as a book of psalms and poetry, so it should not be taken literally.

It came through as amazonian hiëroglyphs, as prose, as cave paintings, very primal.

It is a shamanic medicine wheel, and it came through in raw form, so please do not go whining about spelling errors or grammar errors, as then this book is not for you.

You don’t step into an Egyptian catacomb or a native American cave with cave paintings to whine about spelling errors or grammar errors either, as they were known to encrypt their messages.

The African Sea Scrolls : Its texts are endless. Much of it got lost, just like many of the primal Egyptology got lost throughout times, and much of native American scripture. The manuscripts of the African Sea Scrolls are sometimes in Dutch, sometimes in American, not in modern-western forms but in African forms, so we are more speaking about African-Dutch and African-American.

You cannot understand fully African mythology and Egyptian mythology and Egyptology without Insectian scripture, as that is its bridge, also called the Africa bridge. Insectism is the key to unlock and decode Africology and Egyptology. Therefore these scriptures are a must to delve deeper into those mythologies and its shamanism. This is also the key to understanding the world and life as a whole much better. Basically we experience life through a certain prisma, a certain stone, and we have to learn to use these stones as in an oracle, going to the deeper stones. Insectism is a key in that. It’s an oracle and a map to learn how to use the oracle, in these dangerous realms of the dead. A lot of dangers are luring, so the travellers have to wake up. The oracle reaches out for the travellers for that matter. This is why insectianism or insectism came to this world.

The African Sea Scrolls consist of three main parts :

The African Book of the Dead
The African Book of Psalms
The African Book of Sorrows

These three books also consist of many parts.
